

Sierra Business Council promotes energy efficiency as a part of our mission to provide economic, environmental, and social benefits to the Sierra Nevada through our Sierra Nevada Energy Watch programs.

### Energy Efficiency Services:

- Energy assessments for public schools, local governments, and special districts
- Project management assistance for energy efficiency projects
- Consultation for utility incentives and financing programs
- Contractor referrals for HVAC, refrigeration, and other energy efficiency opportunities

### The Steps to Saving Energy:

1. Schedule a no-cost energy assessment. An energy advisor will walk through the premises and identify energy saving opportunities.
2. An energy advisor will create a personalized proposal identifying energy saving opportunities and return on investment.
3. A licensed contractor will install the energy efficiency upgrades.
4. An energy consultant will perform a final post inspection to verify the work was completed as specified.

**Saving energy and money is easy.**

Call Sierra Business Council to get started at (530) 582-4800.
